Those who have seen and admired the excellent buet of Senator Douglae, executed by Mr. Volk, will be prepared for a new surprise when we say that this statue is marked by an originality as independent of the previous work as that was of any former likeness of the distinguished Senator. It is a saudy, sui generis. The bust exhibite the councessance in repose, and as is always the case with works of this class, betrays in a degree the appearance of "fixing up" for the occasion. This circumstance, without detracting from the accuracy of the likeness, operates to leasen its effect upon those who are familiar with the personal of Mr. Douglas. It represents him addressing the people "from the stump." And here, also, the sculptor has displayed his originality in giving, for the support of the statue, the overcoat (a garment usually worn by Mr. Dauglae) thrown over the stump, instead of a closk, whose folds by artists generally are deemed more graceful and "classic." The weight of the body is thrown upon the right limb, as the orator is in the act of changing his weight of the body is thrown upon the right limb, as the orator is in the act of changing his position. Every outline is imbued with motion, and realizes to the mind with wonderful force the constant energetic activity of the Senator while speaking. The left hand holds a scroll, on which is inscribed "Popular Sovereignty," and toward which the right hand points, in making one of the most remarkable and best known gestures of Mr. Douglas. It is impossible in language to convey any adequate idea of the thought, purpose, energy, inflexibility, power, portrayed in the expression of the face; all, however, who have seen Senator Douglas during the delivery of one of his powerful speeches will at once recognize its truthfulness and force.

LIQUIDATION BY GRAIN SHIPMENTS,-The New York Economist calls attention to the quiet but continued enormous shipments of grain from the West to tide-water. Although the prices are low in New York and in Europe, the shipments if they can. to Europe exceed in quantity any ever before made. This, in the face of the fact of a fine promise of crops in England and on the Contineut, goes to prove that the foreign cemand will at some price, always absorb all the surplus of grain that this country can produce. DRUGS & MEDICINES. From Forncy's Press.

As might have been expected, the recent exposure respecting the manner in which the La Grosse and Milwatkee Railroad Go. obtained grants of land, in Wiscousin, appears to have been a very agreeable morsel of intelligence for the London Times. It figures very extensively on June 11, in "the City article" of the Times, which we know in this country as "the money-market article." The Times thus sums up the charges, condensing the account from the New York Times: DRUGS AND MEDICINES

"The Sate of Wisconsin is held up as that in which the exposure has been most complete.—
The affirst of concern called the La Crossa and Milwaukee Raitroad having lately led to a demand for enquiry which could not be resisted, a committee of the Legi-lature was appointed to examine and report, and the whole history of the concern is now embodied in an official report of 400 pages. From this it appears that the company obtained their docations of land by the direct bribery of the entire Government of the State. Thirteen members of the Sanate received bonds to the amount of £35,000 in sums varying from £2,000 to £5,000 each. Sixty members of the House of Assembly received auma ranging from £1,000 to £2,000 each. Qually four members voted for the bill without pay.

The Governor, of the State received £10,000, his private Secretary £1,000, the Lieutenant-Governor £2,000, the Bank Comptrainer £1,000, and the clerks of the House from £1,000 to £2,000 each.
